

We're working for you. Come check out the view!

Wilmette is working to improve our public streetscapes and open spaces.

The streetscape plan protects existing features, such as on-street parking, street lights, hanging baskets and trees. New features include roadway pavements, traffic signals, sidewalks, decorative lighting, wayfinding signs, seating and plantings. Veterans Park improvements include pavement repairs, lighting, seating and plantings.

Big thanks to our friends in Wilmette for participating in the Downtown Streetscape Plan. Beginning in the summer of 2018, the design team enjoyed hearing inputs about what makes downtown so special – and how it can be improved.
